BOSTON SCIENTIFIC TO ACQUIRE CAMERON HEALTH FOR \$1.35 BILLION

Austin and Houston, Texas – March 8, 2012 – PTV Sciences, a healthcare venture capital and growth equity firm, is pleased to announce that Boston Scientific has exercised its option to acquire Cameron Health in a transaction valued at up to \$1.35 billion. Cameron Health has developed the world's first and only commercially available subcutaneous implantable cardioverter defibrillator – the S-ICD® System. This one-of-a-kind technology has the potential to expand the reach of ICD therapy, offering physicians and appropriate patients a new alternative to traditional ICDs. The acquisition will strengthen Boston Scientific's arrhythmia management portfolio and is a positive outcome for the Cameron Health team and PTV Sciences' investors.

The S-ICD System has received CE Mark and has been commercially available in select geographies, including several major European countries, since 2009. The system has been clinically evaluated in a variety of studies and has been implanted in more than 1,000 patients worldwide. Cameron Health received expedited review status and submitted its PMA application to the U.S. Food and Drug Administration (FDA) in December 2011. FDA approval for the S-ICD System is anticipated in the first half of 2013.

"We are very proud of the accomplishments of the Cameron team and the impact this technology will have on healthcare around the world," commented Rick Anderson, Managing Director of PTV Sciences. "This technology in Boston Scientific's portfolio has the opportunity to set a new standard of care for patients who suffer from irregular heart rhythms."

"This is a great example of PTV Sciences' focus on investing in technologies that are 'with the grain' of healthcare," said Matthew Crawford, Founding Managing Director of PTV Sciences. "As Texas based investors, we have access to a wealth of medical expertise and cutting edge R&D from a host of Texas academic research institutes, ultimately adding value to our portfolio. We love to see when this all comes together to change the patient's experience with healthcare."

About PTV Sciences

PTV Sciences (www.ptvsciences.com), founded in 2003, is a Texas based healthcare venture capital and growth equity firm focused on enabling healthcare entrepreneurs and global innovation.
